

Steel housing

Efficient motor german technology

Number of speed level

Remote control

Recommended maximum height

Low sound pressure level (dB)*according to model

Prepared for door contact. (Opening operation).
*Door contact is optional.
HTW-AC-SA1DS

Double control.

By remote control and control panel of the equipment.

Steel housing

Prepared for door contact

Opening operation.
* Door contact is optional

High efficiency

The air conditioner is designed to perform high energy efficiency and to achieve power saving. Consumption from only 110W, according to model.

Low sound pressure level

Unit is ensured to operate with the lowest noise by ultra-low fan speed and auto adjustment according to system parameter.

Number of speed level

The fan can operate with multi speeds and satisfy different air flow volume requirement

For doors up to 3 meters high

Efficient motor german technology
